

WBT export (process, topic)

This documentation shows how to export processes or topics in the form of a WBT package and what is included in the package.

It's possible to export the lessons involving a particular process or topic as a cohesive WBT. The export package includes:

A version of the process or topic that can be run on the browser as a WBT (index.html). The WBT always starts with a distribution page, from which the individual lessons can be started. This version should be used when you want to make the WBT available in your intranet, for example.

The following settings can be specified for the export:

Export Web-Based Training
