

Creating IT content

Open Training Session
on tts performance suite

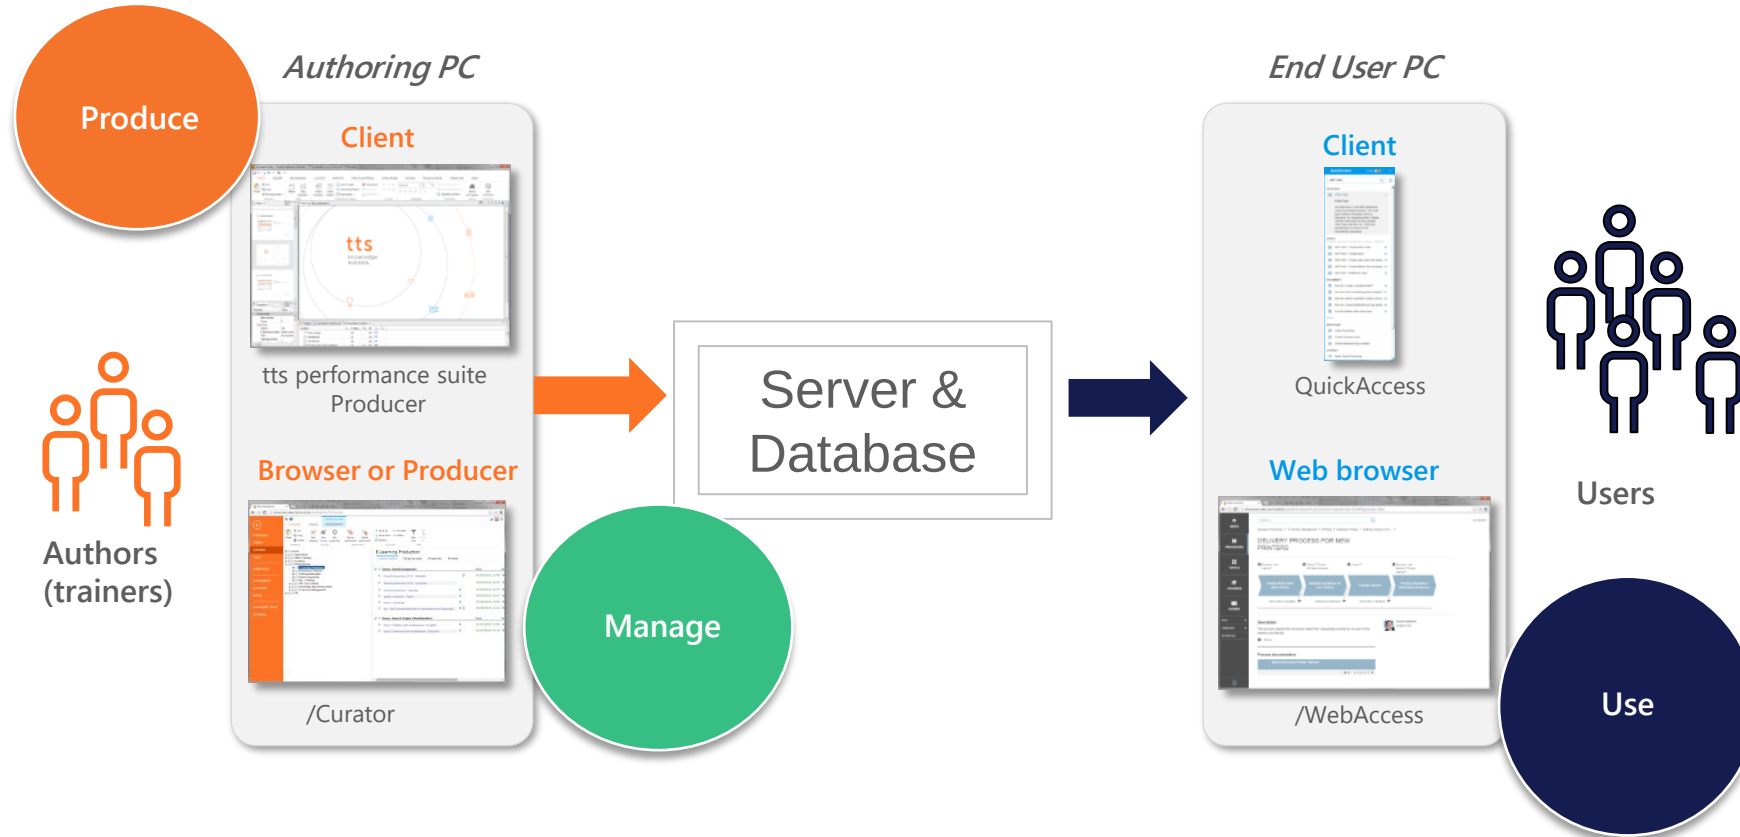

Agenda

- 1 **Record an application and publish the raw recording**
- 2 **The output from the end-users' perspective (QuickAccess)**
- 3 **Adapting the document:**
 - Tweaks to the documentation
 - Tweaks to the guide
 - Adapting an interaction object and an interaction (e-learning)
- 4 **A document's context**
- 5 **Things to know & Outlook**

tts performance suite – simplified architecture

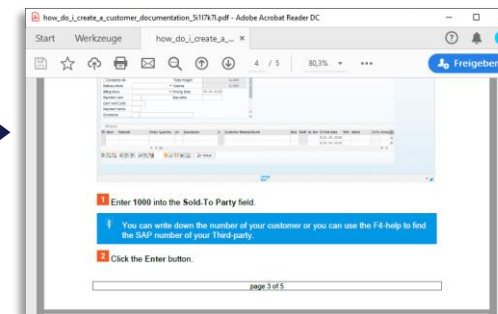

Publishing formats of Producer documents

Business application
e. g. SAP, MS Office,
Web application, etc.

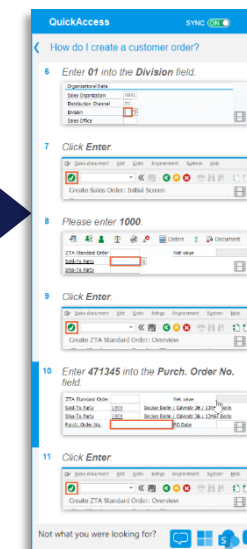

REC

Documentation
(Word, PDF, HTML)

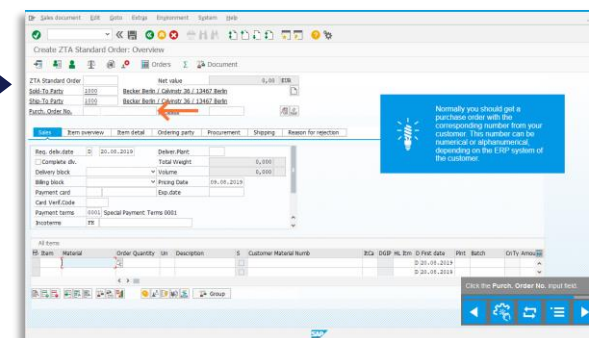

* Creator content:
You may record an
application with the
steplist editor

Editorial Guide

Screenshots
Interaction texts
Simulation objects
Mouse effects

E-Learning
(IT simulation)

recording

QuickAccess

Things to know

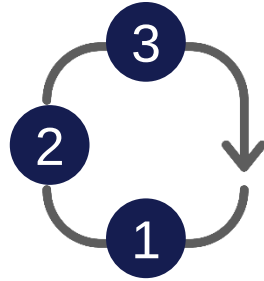

General tips and tricks for recording

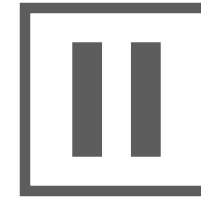

Switch off unused applications

...to keep them from displaying notifications at the wrong time.

You may add steps to a recording

... so there is no need to force yourself to record everything in a single go.

Do use the Pause / the Undo function

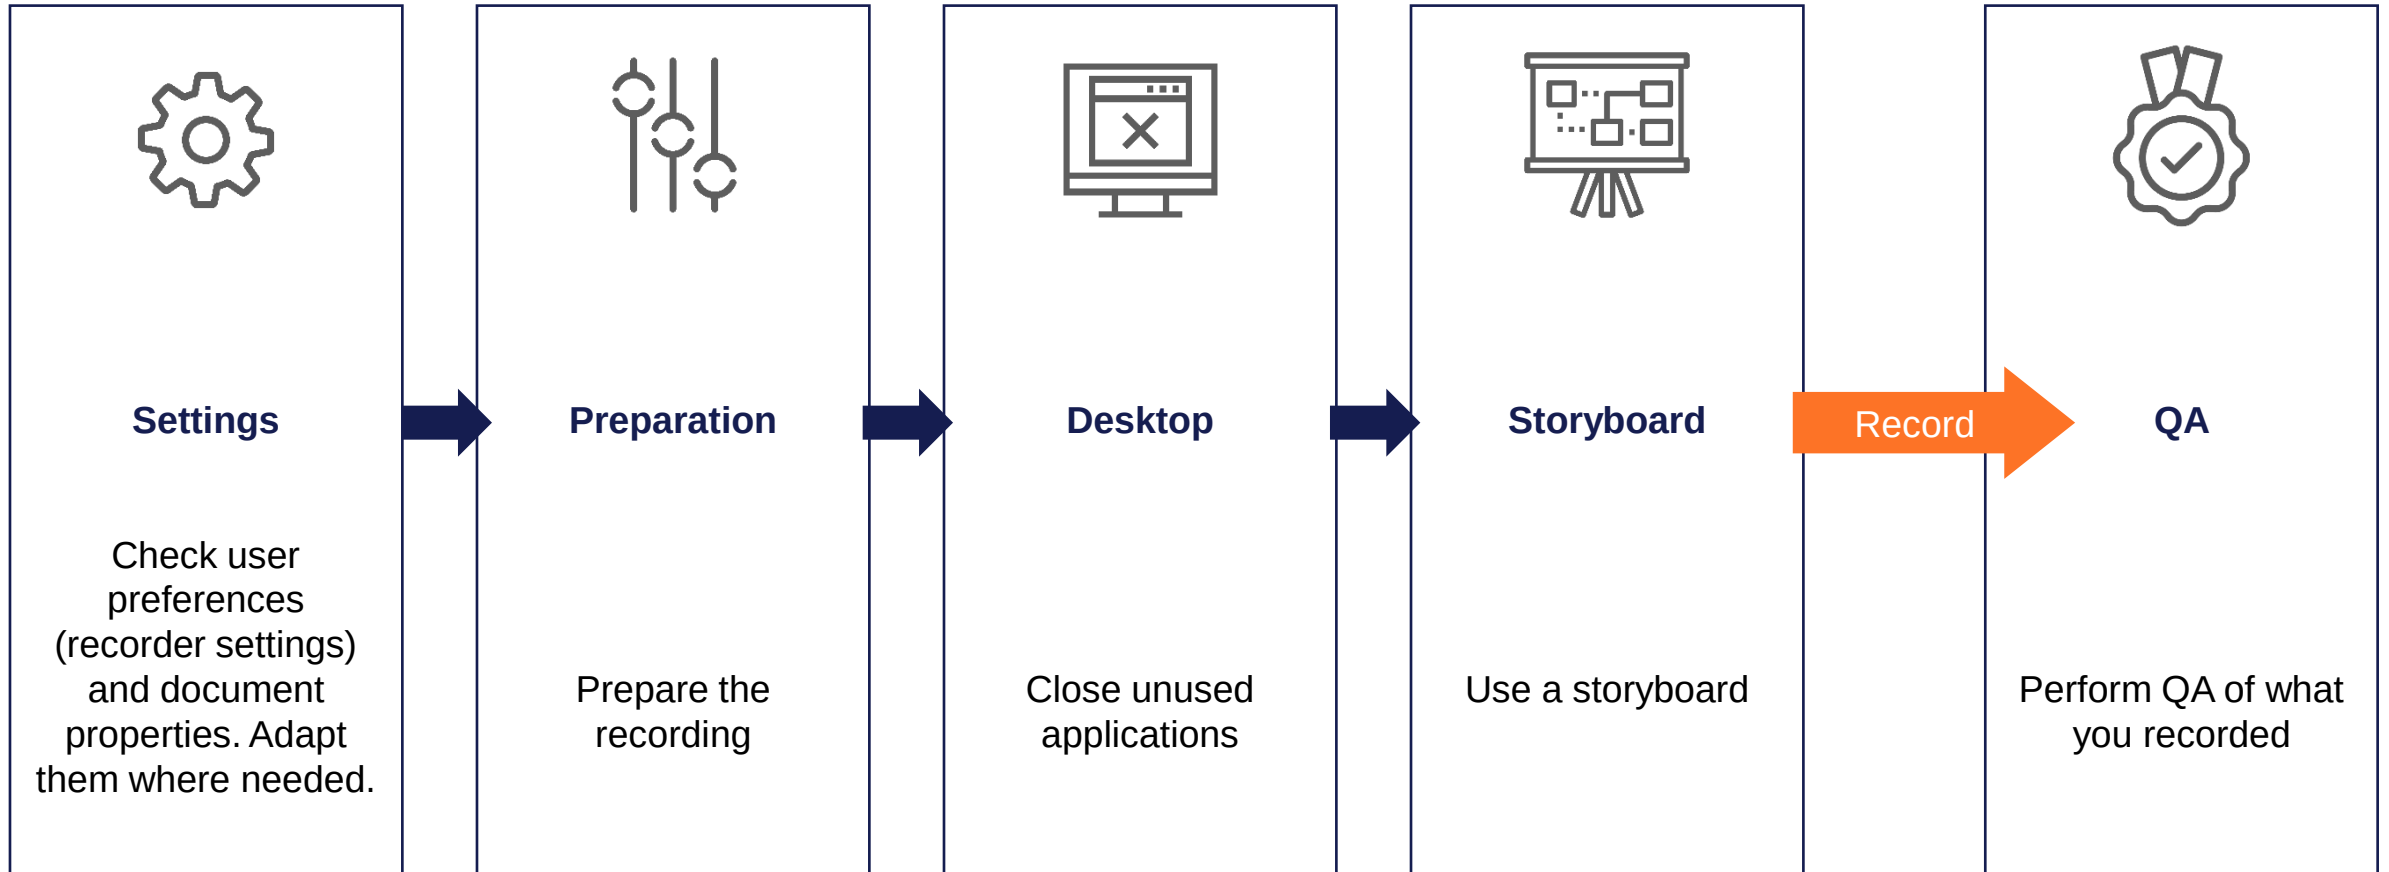

... to correct mistakes as they happen.

Mouse instead of keyboard shortcuts

Use the mouse to activate input fields or checkboxes. Do avoid drag&drop if possible.
