1 Migrate creator migration from TTSPS 2022R2 to TTSPS 2023

Upgrading from TTSPS 2022R2 to TTSPS 2023 requires some configuration changes.

1.1 Required changes in curator application-config.properties

1.1.1 Add `ttkf.server.businessguidancecreator.presignedurl.publickey.endpoint`

 **Without this property, uploads from creator to curator are not possible!**

```
1 ttkf.server.businessguidancecreator.presignedurl.publickey.endpoint=<creator-url>/  
↪ v1/presigned-url/certificate
```

Example

```
1 ttkf.server.businessguidancecreator.presignedurl.publickey.endpoint=http://  
↪ localhost/creator/v1/presigned-url/certificate
```
